- CSS
- Javascript
- SEO
- Graphic Design
- Adobe, Coredraw

ABOUT ME

I'm a WordPress Web Developer with a foundation in HTML, CSS, and JavaScript. I've built and managed some WordPress websites, including e-commerce projects, and I'm comfortable working with CMS platforms. My Diploma in Digital Design complements my coding skills, allowing me to approach projects with both technical expertise and a keen eye for aesthetics. Before this, I worked in the restaurant industry, which taught me how to communicate well with clients and teams and how to juggle different tasks effectively.
